EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: **In the Abstract:**

Abstract line 1, the phrase "The multiplexing" has been changed to --A multiplexing--;

Allowable Subject Matter

2. After a further search and a thorough examination of the present application and in light of the prior art made of record, claims 17-24 are found to be in condition for allowance.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a multiplexing method

and apparatus for multiplexing coded streams with other information including comprising a generating unit operable to code pictures in two access units and to generate one or more coded streams according to a determined time lag from a decoding time of a top picture on decoding order to a display time of a top picture in display order, a multiplexing unit operable to multiplex the one or more coded streams generated by a generating unit and the other information, wherein the other information includes a flag indicating whether the two access units can be connected to each other seamlessly, and the flag is determined depending on whether the delay amounts of the two access units are equal to each other.

It is noted that the closest prior art of record (Radha et al. US Patent no. 6049569) teaches a similar seamless random access method, however, Radha fails to particularly teach or suggest, in combination with the additional limitations making the claims, *“a multiplexing unit operable to multiplex one or more coded streams generated by a generating unit and another information, wherein the other information includes a flag indicating whether two access units can be connected to each other seamlessly, and the flag is determined depending on whether delay amounts of the two access units are equal to each other.”* as specified in the claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2621

Balakrishnan et al. (US Patent no. 6208691) teaches method for seamless splicing in a video encoder.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
